

DIRECTORY OF PROFESSIONAL AESTHETIC PRUNERS 2009

Inspired by aesthetics, guided by nature.

AESTHETIC PRUNING embraces the creative interpretation of small trees and shrubs in the urban context. The living art form combines the artistic skill of the pruner, the essence of a tree, the science of horticulture and needs of clients and surroundings ≈ Dennis Makishima.

About This Directory

The pruners in this directory combine sound horticulture with an eye for movement, line, structure and form. Their focus is on small trees and shrubs, usually under fifteen feet tall. They welcome new challenges in integrating plant material with its surroundings. They deepen garden harmony and unity by pruning within the garden's context.

A respect for trees and their vitality is paramount in their approach. Horticultural, environmental and climatic conditions factor into every aspect of their work. Plant health is their first priority. Much of the work is done on a seasonal basis, that is when conditions are best suited for a particular type of pruning. It may take several prunings to implement their vision, as they progress only as quickly as benefits a tree.

Many of the pruners listed have studied with master pruner Dennis Makishima or with his leading students. They are trained at recognizing natural forms and utilizing them to allow a tree to completely express its essence and tell its story. Each has individual styles and specialties to offer their clients. The aim of this directory is to assist the public in locating a uniquely qualified professional aesthetic pruner.

****Listings are alphabetical by last name.**

www.aestheticpruning.org

DIRECTORY OF PROFESSIONAL AESTHETIC PRUNERS 2009

ALLIGER, MICHAEL (707) 829-3404

Japanese garden pruning and the delicate touch of Japanese maples since 1986. Pruning classes and demonstrations for groups or one-on-one.
